

Industrial Alliance for Semiconductors

Industrial Alliance for Semiconductors

Bringing together key actors
involved in microelectronic
value chain

Funded by
the European Union

Industrial Alliance for Semiconductors: joining forces for a competitive and sustainable semiconductor ecosystem in the EU.

The Industrial Alliance for Semiconductors brings together key actors involved in the microelectronic value chain, from higher education institutions, to research organisations, SMEs, large enterprises and end-user industries.

The objective of the Alliance is to **strengthen Europe's digital sovereignty and competitiveness** by identifying current gaps in the production of microchips and collaboratively align on future actions.

Who can join?

Any organisation with relevant existing or planned activities in the area of processor and semiconductor technologies, including end-user companies, associations, and research and technology organisations, can join the Alliance.

Steps to join the Alliance

1. **Review the eligibility criteria set out in the Terms of Reference**
2. **Sign the Declaration**
3. **Fill out and submit the Application form**

Scan the QR code to access the Terms of Reference, the Declaration and the Application form

For any question please contact us at alliancesecretariat@allpros.eu, putting in cc EU-semiconductors-Alliance@ec.europa.eu.

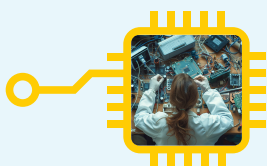

Once accepted as members and participants within the Alliance, organisations can join one or more Working Groups to actively contribute to the objectives and deliverables set out by those Working Group(s).

The European Commission acts as a facilitator to the Industrial Alliance, promoting its activities.

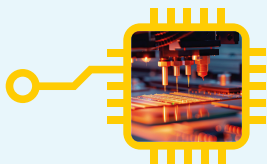

Application for the Alliance remains open indefinitely and organisations may apply and join at any time.

Working Groups: identifying gaps and finding solutions to industry challenges.

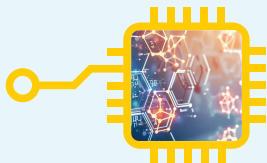

In July 2024, the Alliance organised an inaugural Webinar, where it launched three formal thematic Working Groups. Since then another one has been launched (November 2025):

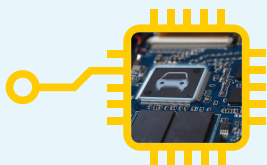

**Working Group
on Skills**

**Working Group
on Supply Chains**

**Working Group
on PFAS**

**Working Group
on Automotive**

4 Working Groups

bringing together industry, academia and policy-makers for a stronger EU semiconductor ecosystem.

The Alliance complements the **European Chips Act** and strengthens cooperation between actors of the electronics value chain in the EU through targeted Working Groups.

Working Group on Skills

Bringing together experts and initiatives working on advancing skills development for the European semiconductor industry

Working Group on Supply Chains

Fostering discussions and targeted actions aimed at increasing the semiconductor supply chain resilience and transparency

Working Group on PFAS

Boosting collaboration on minimizing and mitigating risks related to PFAS, while ensuring sustainability and regulatory compliance

Working Group on Automotive

A joint effort with the European Connected and Autonomous Vehicle Alliance (ECAVA), looking at end-users needs and gaps in the value chain

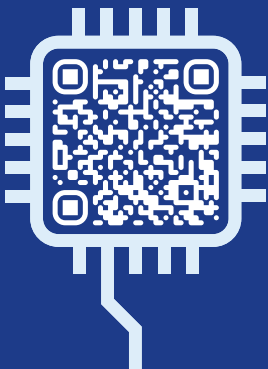

If you are interested in joining any of the three Working Groups, please submit your application to become member of the Alliance.

Join the Alliance!

The EU can lead the next generation of secure, energy-efficient, powerful chips and processors.

Join the
**Industrial Alliance
for Semiconductors**
and provide crucial insights on the main challenges and potential solutions to **make the European semiconductor industry future-proof.**

ALL PROS.EU

2029

ALLPROS.eu 2029 is a EU-project funded under the Digital Europe Programme.

With the launch of the Industrial Alliance for Semiconductors, ALLPROS.eu started its mandate as the Secretariat of the Alliance.

Alongside the support provided to the Alliance and its Working Groups, ALLPROS.eu aims to strengthen the European semiconductor ecosystem by offering:

- **Events and webinars on the most pressing issues for the semiconductor industry**
- **Market analysis and data on the latest trends**
- **Opportunities for collaboration and synergies**
- **A Marketplace for European companies involved in the design and production of microelectronics chips**

The Industrial Alliance for Semiconductors and the Working Groups are supported by the ALLPROS.eu 2029 Project as its Secretariat.
